

LLM-Based User Simulation: MDP Formulation and Initial Results

William Dennis

June 2026

Status

Placeholder. LLM-based user simulation replaces rule-based response models with prompt-driven persona simulation. This specification will be filled in when LLM simulation is implemented.

Current framework support:

- `config/llm_based.yaml` — schema-reference mode config stub
- `src/rl_health_interventions/simulation/` — ABC ready for new registration
